

Name:

Experience

What type of farming are you practicing? Brief description (ex: Is it soil, hydro, etc. also please describe your basic techniques)

Do you have a water sample analysis from site? Y\_\_ N\_\_ if yes, can you please attach a copy

### Nursery Area: Clones, seedlings and starts:

What medium are you using? (this information is crucial in figuring out your nutritional needs)

What brand or type?

How many plants are you planning on propagating at a time?

Do you have a grow medium analysis? (Found on your packaging) or independent lab test?

Do you have any other reports regarding your medium?

Do have specific trays or containers/pots you use? Please name preferred brand

What method do you irrigate with? (please describe)

How long will you propagate plants before moving them to vegetative areas in nursery?

What items do you reuse?(trellis, containers, hosing, etc.)

## Vegetative growth: plants taller than 12"

What medium are you using? (this information is crucial in figuring out your nutritional needs)

What brand or type?

How many plants are you planning on vegging?

Do you have a grow medium analysis? (Found on your packaging) or independent lab test?

Do you have any other reports regarding your medium?

Do have specific trays or containers/pots you use? Please name preferred brand

What method do you irrigate with? (please describe)

How long will you veg your plants before moving them to flowering areas in the facility?

What items do you reuse?:(trellis, containers, hosing, etc.)

## Flowering Cycle:

What medium are you using? (this information is crucial in figuring out your nutritional needs)

- What brand or type?
  
- How many plants are you planning on flowering?
  
- Do you have a grow medium analysis? (Found on your packaging) or independent lab test?
  
- Do you have any other reports regarding your medium?
  
- Do have specific trays or containers/pots you use? Please name preferred brand
  
- What method do you irrigate with? (please describe)
  
- How long will you flower your plants before harvesting?
  
- What items do you reuse?:(trellis, containers, hosing, etc.)
  
- Do you know how much fertilizer you use per harvest?
  
- How tall are you planning on growing your plants?
  
- Do you fertilize each time you water your plants? (If not please explain)
  
- How often do you irrigate your crop?
  
- What size are your mixing tanks and reservoir?

How many nutrient inputs do you use? (parts a,b, supplements , additives)

Do you stake or trills system? (please explain)

### Other:

Other tools: example (sprayers, loppers, pruners, gloves, etc.)

Do you preventive spray and what do you spray?

Do you need odor control?

### Harvest / Processing Equipment:

Please describe employee safety required equipment needed? (gloves , respirators, glasses)

Other tools need?

Storage and Packaging?

Cleaning Supplies?
